EXECUTIVE OVERVIEW

Argoz Energies (Pty) Limited is a locally owned Namibian industrial and energy infrastructure chemical supply Company structured to support offshore, onshore, and heavy industrial operations.

We operate as a disciplined local interface between reputable international manufacturers and critical infrastructure operators, delivering:

- Regulatory-compliant importation and distribution
- Full SDS/TDS documentation management
- Structured supplier qualification
- Traceable and compliance-aligned supply coordination
- Operational continuity support for mission-critical facilities

Argoz Energies is positioned to support Namibia's growing Oil & Gas and industrial infrastructure sectors through responsible representation, structured supply governance, and risk-aware distribution practices.

ENERGY & OFFSHORE INFRASTRUCTURE FOCUS

Argoz Energies prioritises supply to:

- FPSOs
- Offshore platforms
- Onshore terminals and tank farms
- Gas processing facilities
- Storage depots
- Fabrication yards and shore bases

We supply industrial chemicals and maintenance materials used in:

- Corrosion mitigation systems (topside piping, tank lining chemicals for storage vessels, etc)
- Surface preparation and treatment
- Equipment preservation
- Cleaning and degreasing programs
- Lubrication support systems
- Structural protection and tank lining systems

Our focus remains on facility and infrastructure support

CORE CAPABILITIES

Energy Infrastructure Chemical Distribution

Supply coordination of:

- Maintenance chemicals for offshore and onshore facilities
 - Corrosion inhibitors (facility and infrastructure use)
 - Surface preparation materials
 - Cleaning and degreasing systems
 - Preservation compounds for rotating equipment environments
- Designed to support asset longevity and infrastructure integrity.

Protective Coatings & Surface Protection

Supply coordination of:

- Marine-grade coatings
- Anti-corrosion paint systems
- Structural steel protection materials
- Tank lining and containment protection systems

Industrial Lubrication & Maintenance Support

- Industrial lubricants
 - Metalworking fluids
 - Hydraulic oils
 - Equipment protection compounds
- Aligned with OEM technical specifications where applicable.

General Industrial & Operational Consumables

Supporting:

- Maintenance operations
- Port and terminal services
- Fabrication yards
- Industrial construction environments

PRODUCT & APPLICATION PORTFOLIO

Offshore & Marine Chemicals

- Cleaning and preservation chemicals
- Surface treatment materials
- Marine-grade protection compounds

Industrial Process Chemicals

- Processing chemicals
- Facility treatment compounds
- Maintenance-grade supply systems

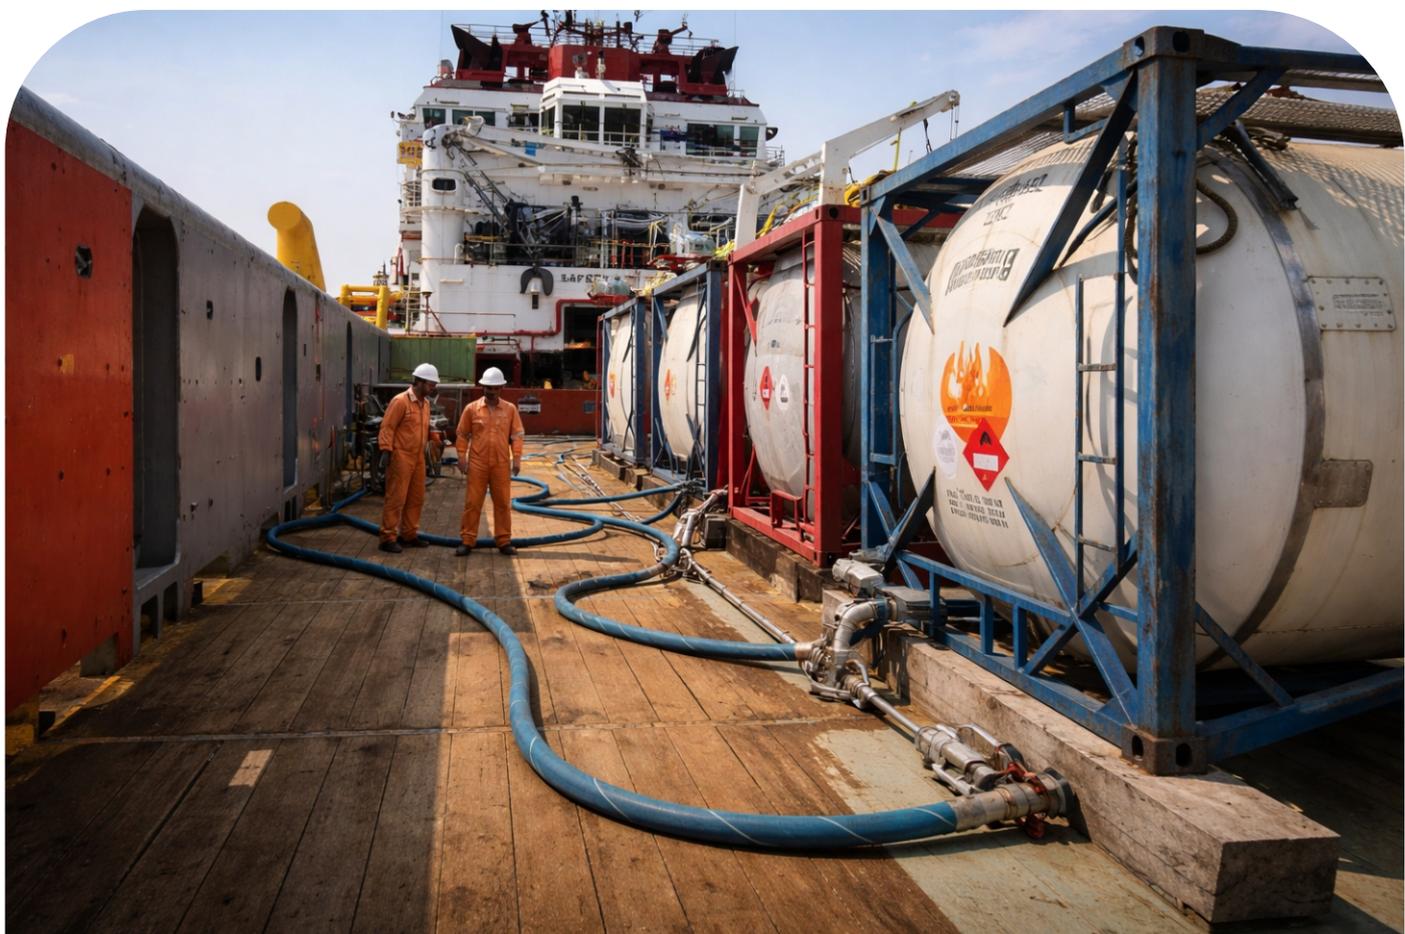

Protective Coatings & Resins

- Anti-corrosion systems
- Surface preparation materials
- Infrastructure protection coatings

Lubrication & Equipment Maintenance

- Industrial lubricants
- Hydraulic fluids
- Maintenance consumables

FPSO & OFFSHORE SUPPORT MODEL

Argoz Energies supports offshore operators through:

- Compliant import coordination
- SDS and safety documentation control
- Hazard classification review
- Structured logistics interface coordination
- Supply continuity planning

Our offshore supply model emphasizes:

- Documentation traceability
- Environmental compliance alignment
- Safe transport awareness
- Timely delivery to shore base or terminal

MINING & HEAVY INDUSTRY SUPPORT

- Beyond oil & gas, Argoz supports:
- Mining operations
- Processing plants
- Manufacturing facilities
- Port infrastructure

Providing:

- Process-support chemicals
- Lubricants
- Protective coatings
- Maintenance materials

SUPPLY CHAIN, COMPLIANCE & DOCUMENTATION

Argoz Energies operates under a structured compliance framework:

- SDS and TDS documentation retained and controlled
- Supplier qualification procedures
- Import and customs alignment
- Batch-level traceability where applicable
- Ethical sourcing requirements
- Export compliance awareness

We prioritise working with manufacturers meeting international standards.

ESG & ENVIRONMENTAL STEWARDSHIP

Recognising the environmental sensitivity of offshore and industrial operations, Argoz commits to:

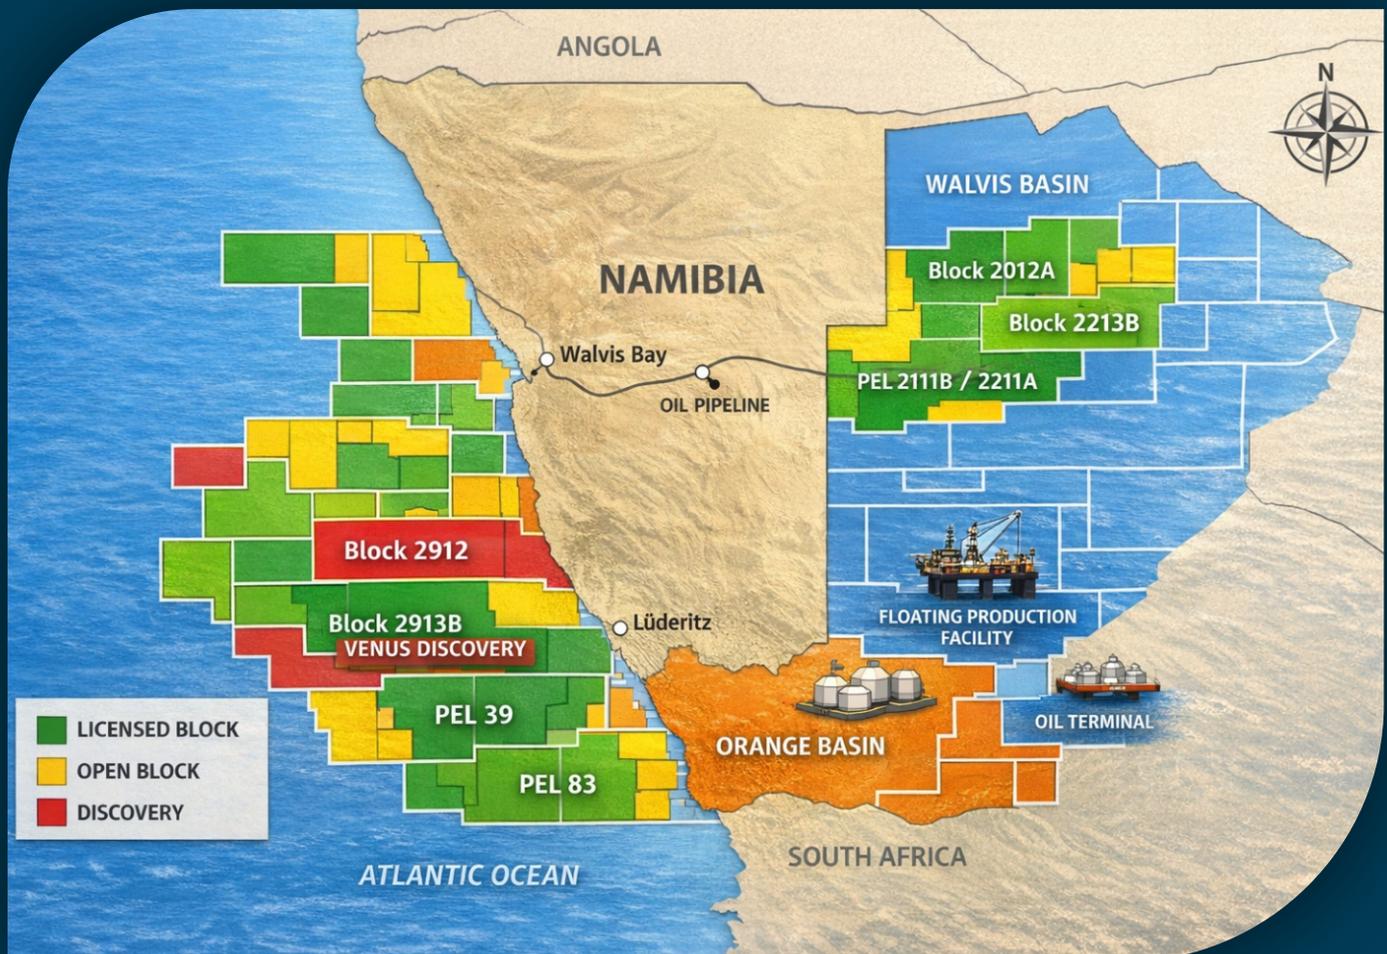

- Responsible sourcing
- Safe storage coordination
- Environmental regulatory compliance
- Hazard awareness guidance
- Responsible Packaging

Environmental responsibility is embedded in our supply philosophy.

GOVERNANCE & RISK MANAGEMENT

Argoz Energies operates under structured governance principles:

- Ethical commercial conduct
- Alignment with international anti-bribery principles
- Transparent pricing practices
- Supplier qualification oversight
- Compliance-first operational culture

TECHNICAL APPENDIX

Standards, Compliance & Operational Assurance Regulatory & Standards Alignment

Where applicable, Argoz supports alignment with:

- ISO-certified manufacturer systems
- OEM specification requirements
- IMDG Code for marine transport
- UN hazardous goods classification
- Namibian import and customs regulations

Documentation & Traceability Framework

- Safety Data Sheet retention
- Technical Data Sheet control
- Import documentation archive
- Supplier qualification records

Offshore & FPSO Handling Considerations

- Hazard documentation review
- Shore base coordination
- Compliance documentation prior to dispatch
- Alignment with offshore material intake procedures

Supplier Qualification Framework

Supplier evaluation includes:

- Manufacturer credibility
- Technical performance documentation
- Environmental compliance data
- Ethical sourcing alignment
- Export compliance confirmation

WHY ARGOZ ENERGIES?

- Structured industrial & energy-focused Company
- Offshore and FPSO support orientation
- Compliance-driven documentation framework
- Responsible sourcing philosophy
- Clear specialization boundary
- Local presence with international alignment
